

Concepts and Products for Hybrid and Alternative Powered Vehicles

The global trend for hybrid and alternative powered vehicles demands technology driven solutions for energy distribution.

Tyco Electronics is a leader in next-generation transportation technologies and products for hybrid and alternative powered vehicles. Our broad range of capabilities, concepts and products make us your ideal source for complex systems engineered for hybrid and alternative powered vehicles.

Tyco Electronics' Global Automotive Division capabilities for hybrid and alternative powered vehicle components include:

- High voltage power distribution
- High voltage connectors and cables
- High voltage relays and contactors
- Sensors
- Temperature protection devices

Contact us, we have solutions!
