New Tyco Electronics Pin Insertion Machine Line Provides Robust Feature Set at a Moderate Price

Tyco Electronics announces the AccuSserter 2 pin insertion machine product line. The new line is designed for mid-volume production levels, and offers a set of features and performance level typically not seen in machines in its price range. The AccuSserter 2 machine can apply both Tyco Electronics' and other manufacturers' products and provides flexibility to address both current and future tooling needs.

The AccuSserter 2 machine can be supplied with a rotary insertion finger that applies products at different angles without decreasing the insertion rate. This eliminates costly lost production time associated with rotating the PCB. Product-specific tooling is provided in tooling packs that can easily be changed from one product to another. This helps to greatly reduce initial capital expenditure while reducing the time associated with product change out.

Today's most demanding production operations require equipment that meets design specifications and assures end product quality. The AccuSserter 2 machine can use electrical continuity or discrete pin penetration sensing, which provides real-time assurance that each product was correctly inserted in the PCB and remained in place. There is no additional quality check step required, and all QC data can be stored via the system PC for 100% future traceability.

The AccuSserter 2 machine is also designed to provide a great deal of flexibility. Each product is applied by a specific "quick change" product tool pack that minimizes initial cost while maximizing platform capabilities. The AccuSserter 2 machine can be supplied with two insertion heads for inserting different contacts.

About Tyco Electronics

Tyco Electronics Ltd. is a leading global provider of engineered electronic components, network solutions, undersea telecommunication systems and wireless systems, with 2007 sales of US\$13.0 billion to customers in more than 150 countries. We design, manufacture and market products for customers in industries from automotive, appliance and aerospace, defense and marine to telecommunications, computers and consumer electronics. With over 7,000 engineers and worldwide manufacturing, sales and customer service capabilities, Tyco Electronics' commitment is our customers' advantage. More information on Tyco Electronics can be found at www.tycoelectronics.com.
