

Customizing Your Tyco Electronics Power Connector

Tyco Electronics offers a variety of modular power connectors that can be customized to fit specific application requirements. Customizing a power connector for your needs can be simple – just follow these easy steps:

1. Print and complete the appropriate [Layout Form](#) for the specific connector family you need. Please print clearly and include your complete contact information. Also advise if you require a drawing, samples and quantity, and/or price. Including a customer drawing, picture, or sketch can be helpful.
2. Return the completed layout form and other attachments to:
 - a. Your local Tyco Electronics Sales Representative
 - b. Tyco Electronics Product Information Center
3. A Tyco Electronics engineer will contact you to clarify your requirements.
4. Tyco Electronics will provide the necessary drawings, samples and product quote requested.

Note: Custom layout forms are available for the following products:

FLATPAQ, Drawer, & MULTI-BEAM XL Product.
