

HARSH ENVIRONMENTS REQUIRE

RELIABILITY AND TRUST

SEALED CONNECTION SYSTEMS THAT DELIVER EXCEPTIONAL PERFORMANCE

WHY CHOOSE HD AND DT CONNECTORS

- In use in some of the toughest jobs around
- Used by fleets, service providers, and customers of all types
- Proven reliable when millions of dollars are at stake
- Ideal when you can't afford a day of downtime

WHY WE'RE DIFFERENT

We have been trusted by original equipment manufacturers (OEMs) and maintenance, repair, and overhaul (MRO) organizations for more than 40 years.

- **Supplier of choice** for ruggedized connector systems that provide exceptional performance.
- **Globally available**, with millions invested in capacity expansion to meet increased demand.
- **Complete set of solutions**, with TE application tooling, field service tools, full technical documentation, engineering support, and more.
- Supported by DEUTSCH **internal training** and LADD **distribution centers**.
- Proudly connecting **more than a billion circuits** every single year.

APPLICATIONS

Wire-to-Wire

Sensors

Lights

Gauges

Wire-to-Board

Actuators

Switches

Solenoids

DEUTSCH HD AND DT CONNECTORS

You know our world-class DEUTSCH Common Contact System:

- Pins and sockets size 4, 8, 12, 16, and 20.
- Available in solid, stamped and formed versions.
- A wide selection of plating finishes.

GET TO KNOW OUR CONNECTORS

The HD and DT connector families are versatile, supporting a wide range of applications.

HD PRODUCTS

- Robust circular connection systems with quick connect/disconnect bayonet coupling.
- Metal shell HD30, plastic shell HDP20, and smaller diagnostic HD10 series product families.
- All using durable DEUTSCH pin and socket common contacts.

DT PRODUCTS

- Rugged rectangular connection systems with cantilever latches that use separate wedge locks.
- Regular DT, Miniature DTM, and Power DTP series product families.
- All using durable DEUTSCH pin and socket common contacts.
