

# Neurovascular

## Minimally Invasive Device Solutions

Specializing in Minimally Invasive Access & Delivery devices, TE Connectivity, provides the full spectrum of services to design, develop and deliver finished medical devices to market. We offer a comprehensive range of outsourced solutions to medical device companies - from clinical and regulatory support to innovative design and reliable manufacturing services.

Diagnostic and treatment devices in the neurovasculature require highly specialized, complex and miniaturized access and delivery systems. Serving the market leading players in this specialized field, we offer a range of unique solutions to access, navigate and deliver Minimally Invasive Neurovascular therapies. We are the world's number 1 provider of components, sub-assemblies and manufacturing services for aneurysm embolization, thrombectomy, flow diversion, occlusion and carotid artery stent delivery systems.

### WE HAVE EXTENSIVE DESIGN AND MANUFACTURING EXPERTISE IN:

- Microcatheters to 1 French profile, OTW and flow-directed
- Aneurysm Coiling Access and Delivery Systems
- Stent & Graft Delivery Systems
- Neurovascular Guidewires, Workhorse & Speciality
- Occlusion & Balloon Catheters
- Thrombolytic Removal Catheters, Occlusion & Aspiration
- Carotid Artery Stent Delivery & Embolic Devices
- Vascular Closure Devices

TE Connectivity, is ranked among the Top 10 global providers of outsourced design and manufacturing services to the medical device industry and operates from a global network spanning the US, Europe and Asia.
