

# Cosmic 927R Micro-Cable Stripper

## Fast Facts

- For most wire types, optimized to maximize stripping quality
- Can be selected to twist with clockwise/counterclockwise or non-twist
- Power supply: 100 - 240 VAC
- Digital display for wire diameter
- Can be set to a wide variety of functions
- Compact, lightweight, benchtop

***Ultramodern technology has been developed into a precision micro-cable stripping machine.***

The demand for a precision cable stripper that can handle various wire insulation materials such as small and compact electronic devices and communication equipment has been met. The **Cosmic 927R** was designed and developed to reliably strip various insulation materials and micro-cable. From conductor diameter 36 AWG to 10 AWG (0.11mm to 3.5mm), the stripping diameter display can be set to within 0.1 mm increments. Thus optimal stripping quality is guaranteed and damage to the conductor is eliminated.

Description	Part No.	Price/ea
Cosmic 927R Benchtop Stripper	5-528367-1	4,995.00
Spare Blade Set	9-547951-2	260.00
Gripper Set	1-509805-8	389.00
Foot Pedal	547217-4	92.50

# Cosmic 927R Micro-Cable Stripper

## Technical Specification

Workable wire sections: 36 - 10 AWG

Stripping length: 1.0 - 25.0 mm

Partial stripping length: Minimum 1.0 mm

Insulation material: Teflon, Rubber, PVC, etc

Machine cycle: Max 1.5 sec

Blade material: Tool steel / Carbide (optional)

Electrical requirement: AC100V - 240V / 60VA

Net weight: 8kg

## Special Function

Twist or non-twist

Stripping head rotation direction

Rotation time

## Optional

Foot switch

Partial Strip Indicator
